Broadview Wind

Pattern Energy operates the Broadview Wind facility in Curry County, New Mexico, and Deaf Smith County, Texas.

Meaningful Partnerships

We believe in acting as a good neighbor through long-term engagement and giving. Pattern Energy equally commits to listening and respecting the landowners and communities that host our facilities through relationship building, open communication, and the reception of feedback. We encourage you to call or email our team to start a conversation.

Job Creation

During construction in 2016, utilized approximately 650 workers on-site, including equipment operators, electricians, laborers, and more. With the help of local contractors, 18 permanent staff operate and maintain the facility and the neighboring Grady Wind facility.

Community Benefits

Broadview Wind's Community Benefits Program has involved donations to the Broadview Firehouse, Bootleg Volunteer Fire Department, Village of Grady, and Grady Municipal School District. The facility continues to give back through community sponsorships and donations.

Lasting Revenue

Provides local families with a new reliable income source through land leases. The facility will make significant contributions to local government and services through taxes and other funding commitments supporting programs such as education and public safety. Over the first 25 years of operations, the facility expects to generate more than $30 million in tax payments to local counties and school districts.

Harnessing the Wind

Wind energy provides local and sustainable electricity to the nation's energy mix. Today's wind energy technologies deliver affordability and reliability, making wind an ideal energy source.

The 324 MW facility uses 141 Siemens Gamesa 2.3 MW wind turbines, with turbine blades from Iowa and nacelles from Kansas. Broadview Wind provides safe, affordable, and renewable electricity to power the needs of more than 300,000 Americans yearly. Commercial operation began in 2017. Output is sold to Southern California Edison under two 20-year power purchase agreements.

About Us

Pattern Energy is a leading developer, operator and owner of renewable energy infrastructure projects and facilities across North America. Our mission is to transition the world to renewable energy through the sustainable development and responsible operation of facilities with respect for the environment, communities, and cultures where we have a presence.

Our approach begins and ends with establishing trust, accountability, and transparency. Our company values of creative spirit, pride of ownership, follow-through, and a team-first attitude drive us to pursue our mission every day. Our culture supports our values by fostering innovative and critical thinking and a deep belief in living up to our promises.

Headquartered in San Francisco, Pattern has a portfolio of power facilities and transmission assets producing and transporting nearly 6,000 MW of power across North America, serving various customers that provide low-cost clean energy to millions of consumers.
